Landing Page

———

Our splash page image is artistic and bold, instantly elevating the product to the level of data art and science. The organization of the page remains true to the original to streamline updates.
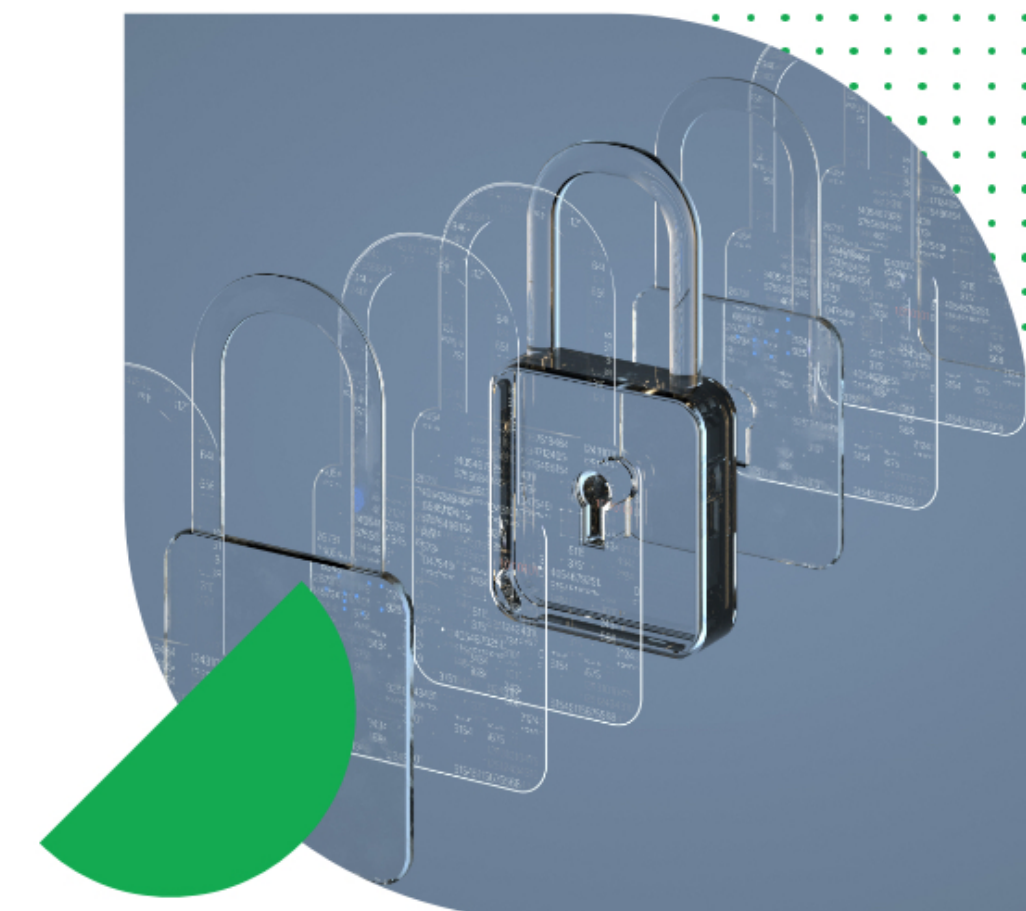

mongoDB®

Landing Page

———

Photos are framed within leaf-like containers, which reference our logo and our founders' belief that coding should be natural. Typography has been updated slightly to provide greater hierarchy and legibility.

———

Accelerate Performance

Atlas's built-in Performance Advisor automatically analyzes your frequently used queries and alerts you to collections with suboptimal performance. Scan the relevant metrics, and just click a button to create a recommended index. Painless, and powerful.

———

Sleep Soundly

We've spent a lot of time thinking about security and regulatory compliance, so you don't have to. Atlas provides tools to monitor activity by user and even lets you bring your own encryption keys. At rest or in motion - your data is secure.

![mongoDB logo]

Landing Page

The overall appearance of the page is light and airy with pops of color from the accompanying geometric forms. These shapes also preserve the general look of some of the band's preexisting iconography.
